Osmose, Inc. Acquires Brazilian Wood Preservative Business

Griffin, GA., April 7, 2011 – Osmose, Inc., a global supplier of wood preservative products, announced today that it has acquired the wood preservative distribution business of Indústria Química Dipil Ltda (Dipil) on March 29, 2011. Dipil has manufactured and sold wood preservatives into the Brazilian market for more than 10 years. Osmose will operate in Brazil as “Tecnologias de Madeiras Brasileiras” (Brazilian Wood Technologies).

Javier Romero, Managing Director of Central and South America for Osmose, Inc., stated, “The acquisition of the wood preservation business from Dipil strengthens Osmose’s commitment to wood treating companies in Brazil. This new acquisition, along with Osmose’s current operation in Chile, furthers our commitment to the wood preservation business in Central and South America.”

Osmose, Inc. is the leading worldwide supplier of wood preservatives used to protect wood in outdoor environments against fungal decay and termite attack. Since 1934, Osmose has produced high-quality, reliable wood preservatives and its current product offerings include CCA, ACQ, and its patented MicroPro[®] products incorporating its micronized copper wood preservative technology.
